Abstract: Respondents are existing facilities and new OSWI units, which include two sub-categories: 1) very small municipal waste combustion (VSMWC) units that combust less than 35 tons per day of waste; and 2) institutional waste incineration (IWI) units. These standards apply to any air quality program in a state or United States protectorate with one or more existing other solid waste incineration (OSWI) units or air curtain incinerators that commenced construction on or before December 9, 2004. This subpart does not directly affect incineration unit owners and operators; however, they must comply with the state's plan that was developed by the air quality program administrator to implement the emission guidelines.

Form Numbers: None.

Respondents/affected entities: OSWI units, which include two subcategories: VSMWC units that combust less than 35 tons per day of waste and IWI units.

Respondent's obligation to respond: Mandatory (40 CFR Part 60, Subpart FFFF).

Estimated number of respondents: 99 (total).

Frequency of response: Initially, occasionally, semiannually, and annually.

Total estimated burden: 70,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$7,560,000 (per year), including \$495,000 in either annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated labor burden as currently identified in the OMB Inventory of Approved Burdens. This not due to any program changes. The increase occurred because we assume existing respondents will take some time to re-familiarize themselves with the rule each year. In addition, the cost estimate has been updated using more current labor rates.
